## KATA PENGANTAR

---

Publikasi Produk Domestik Regional Bruto Kabupaten/Kota di Indonesia 2021–2025, merupakan publikasi rutin yang menyajikan angka total PDRB kabupaten/kota, baik atas dasar harga berlaku maupun atas dasar harga konstan 2010. Data yang disajikan dalam publikasi ini meliputi tabel-tabel turunan seperti laju pertumbuhan, PDRB per kapita dan kontribusi antar kabupaten/kota terhadap masing-masing provinsinya.

Penghitungan PDRB kabupaten/kota ini telah mengadopsi standar internasional, yaitu Sistem Neraca Nasional (*System of National Accounts/ SNA*) 2008, guna menjaga keterbandingannya dengan indikator sejenis di tingkat global. BPS berkomitmen untuk terus melakukan penyempurnaan, sehingga dukungan dan kerja sama dari penyedia data dasar sangat kami harapkan demi kualitas publikasi yang semakin baik.

Kami menyampaikan apresiasi dan terima kasih kepada semua pihak yang telah berperan, baik langsung maupun tidak langsung, dalam penyusunan publikasi ini. Kritik dan saran yang membangun selalu kami harapkan untuk penyempurnaan isi dan format publikasi edisi selanjutnya.

Semoga publikasi ini dapat memberikan manfaat yang nyata bagi banyak pihak untuk berbagai keperluan, khususnya perencanaan dan evaluasi kebijakan.

## PREFACE

---

*The Gross Regional Domestic Product of Regencies/Municipalities in Indonesia 2021–2025 is a regular publication presenting total GRDP of regencies/municipalities, both at current market prices and at 2010 constant prices. The data presented includes comprehensive derived tables covering growth rates, GRDP per capita, and the economic contribution of each regency/municipality to its respective province.*

*The estimation of GRDP by regency/municipality adopts the international standard of the System of National Accounts (SNA) 2008, to ensure comparability with similar global indicators. BPS-Statistics Indonesia is fully committed to continuous improvement, therefore support and cooperation from primary data providers are highly expected to future enhance the quality of this publication.*

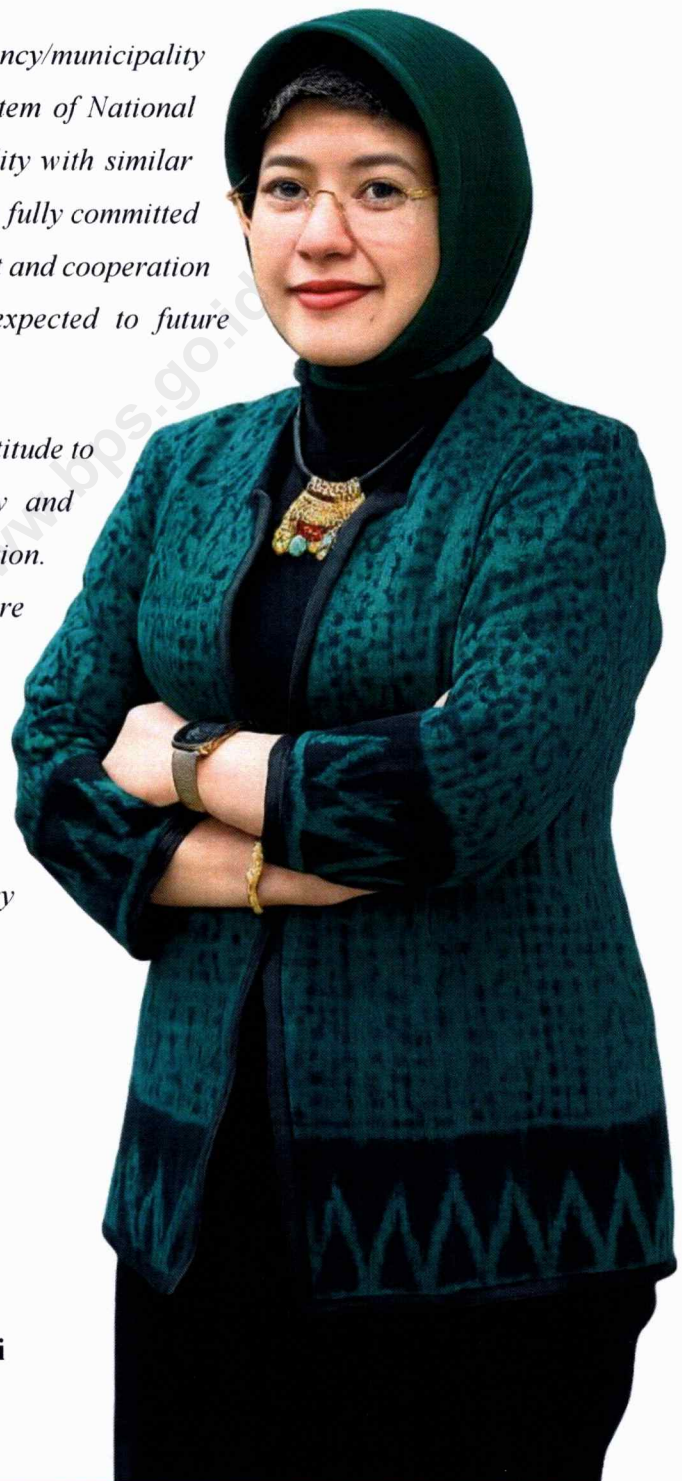

*We extend our appreciation and gratitude to all parties who have contributed, directly and indirectly, to the preparation of this publication. Constructive feedback and suggestions are always welcome for the improvement of the content and format of future editions.*

*We hope this publication proves tangible benefits to various stakeholders for multiple purposes, particularly for policy planning and evaluation.*

# TINJAUAN SINGKAT

## *Brief Overview*

## **I. TINJAUAN SINGKAT**

### **1.1 Pendahuluan**

Perencanaan pembangunan ekonomi memerlukan data statistik sebagai dasar berpijak dalam menentukan strategi kebijakan, agar sasaran pembangunan dapat dicapai dengan tepat. Berbagai data statistik yang bersifat kuantitatif diperlukan untuk memberikan gambaran tentang keadaan pada masa lalu dan masa kini, serta sasaran-sasaran yang akan dicapai pada masa yang akan datang. Strategi dan kebijakan yang telah diambil perlu dimonitor dan dievaluasi hasil-hasilnya menggunakan data statistik.

Pada hakikatnya, pembangunan ekonomi adalah serangkaian usaha dan kebijakan yang bertujuan untuk meningkatkan taraf hidup masyarakat. Hal ini dilakukan dengan memperluas lapangan kerja, pemeratakan distribusi pendapatan masyarakat, meningkatkan hubungan ekonomi regional dan melalui pergeseran kegiatan ekonomi dari sektor primer ke sektor sekunder dan tersier. Dengan kata lain, arah dari pembangunan ekonomi adalah mengusahakan agar pendapatan masyarakat naik, disertai dengan tingkat pemerataan yang sebaik mungkin.

Untuk mengetahui tingkat dan pertumbuhan ekonomi suatu wilayah, perlu disajikan data Produk Domestik Regional Bruto (PDRB) secara berkala, untuk digunakan sebagai bahan perencanaan pembangunan nasional atau regional khususnya di bidang ekonomi. PDRB tersebut juga dapat dipakai sebagai bahan evaluasi dari hasil pembangunan ekonomi yang telah dilaksanakan oleh berbagai pihak, baik pemerintah pusat, pemerintah daerah, maupun swasta.

## **I. BRIEF OVERVIEW**

### **1.1 Introduction**

*Planning for economic development requires statistical data as a foundation in formulating policy and strategy, so that development targets can be achieved appropriately. Several of quantitative statistical data are needed to provide information about the conditions in the past and the present, and also the targets that should be achieved in the future. The strategies and policies that have been taken need to be monitored and evaluated using statistical data.*

*Essentially, economic development refers to a series of initiatives and policies aimed at improving the community's standard of living. This is achieved through job creation, equitable income distribution, strengthened regional economic linkages, and the structural shift of economic activities from the primary sector to the secondary and tertiary sectors. In other words, economic development seeks to raise people's incomes while ensuring the highest possible degree of equity.*

*To assess the economic level and growth of a region, Gross Regional Domestic Product (GRDP) data must be presented regularly as a basis for national or regional development planning, particularly in the economic sector. GRDP can also serve as a tool for evaluating the outcomes of economic development implemented by various stakeholders, including the central government, local governments, and the private sector.*

Pembangunan di segala bidang yang menjangkau seluruh pelosok tanah air memerlukan data Produk Domestik Regional Bruto (PDRB) sesuai dengan batas-batas wilayah administrasi pemerintahan, untuk perencanaan pembangunan khususnya bidang ekonomi sekaligus evaluasi hasilnya.

## **1.2 Kerangka Dasar Ekonomi Regional**

Transaksi ekonomi yang dilakukan oleh masyarakat dalam kehidupan sehari-hari, secara sederhana dapat dibedakan menjadi dua kelompok besar yaitu: kelompok produsen dan kelompok konsumen. Kelompok produsen menggunakan faktor produksi yang berasal dari kelompok konsumen dan digunakan untuk menghasilkan barang dan jasa.

Kelompok konsumen memiliki faktor produksi seperti tanah, tenaga, modal dan kewirausahaan yang diberikan pada perusahaan dan menerima balas jasanya berupa sewa tanah, upah dan gaji, bunga modal dan keuntungan. Balas jasa yang diterima ini disebut nilai tambah, yang selanjutnya digunakan oleh konsumen untuk membeli barang dan jasa dari produsen untuk dikonsumsi. Transaksi dari kedua kelompok tersebut terjadi secara berkesinambungan dan membentuk siklus perekonomian yang bisa membesar dan mengecil. Gambar dibawah ini menunjukkan perputaran perekonomian yang sederhana antara kelompok perusahaan dan kelompok rumah tangga di dalam suatu perekonomian yang tertutup atau di dalam suatu daerah yang tidak melaksanakan transaksi dengan daerah lain.

*Comprehensive development that reaches all parts of the nation requires Gross Regional Domestic Product (GRDP) data based on government administrative boundaries, to support development planning, especially in the economic sector, and to evaluate its outcomes.*

## **1.2 Basic Frame of Regional Economy**

*The economic transactions conducted by people in their daily lives, can simply be divided into two major groups, which are producer groups and consumer groups. Producer groups use production factors from consumer groups to produce goods and services.*

*The consumer group owns factors of production such as land, labor, capital, and entrepreneurship, which are supplied to firms and compensated in the form of land rent, wages and salaries, interest on capital, and profit. This compensation is referred to as value added, which consumers then use to purchase goods and services from producers for consumption. Transactions between these two groups occur continuously and form an economic cycle that can expand or contract. The figure below illustrates the simple economic flow between the business sector and the household sector in a closed economy or within a region that does not engage in transactions with other regions.*

Catatan :

- a) menunjukkan arus penyediaan faktor produksi;
- b) menunjukkan arus barang dan jasa yang dibeli konsumen;
- c) menunjukkan arus uang, yang dikeluarkan konsumen untuk konsumsi;
- d) menunjukkan arus balas jasa faktor produksi.

Notes:

- a) shows the flow of production factors supply;
- b) shows the flow of goods and services purchased by consumer;
- c) shows the flow of money which spent by consumer;
- d) shows the flow of production factors benefits;

Gambar tersebut menunjukkan bahwa aliran barang dan jasa yang dihasilkan oleh perusahaan akan sama dengan aliran uang yang diterima oleh rumah tangga, dan juga sama dengan besarnya nilai uang yang dibelanjakan oleh rumah tangga.

Pada kenyataannya, barang dan jasa yang digunakan baik untuk konsumsi maupun untuk pembentukan modal, tidak semua berasal dari dalam negeri tetapi sebagian dari luar negeri. Sebaliknya barang dan jasa yang dihasilkan di dalam negeri tidak semuanya digunakan di dalam negeri tetapi sebagian digunakan di luar negeri, yang mencerminkan perekonomian terbuka.

Dalam hal pendapatan regional, pengeluaran luar negeri juga termasuk luar daerah. Demikian juga uang yang digunakan sebagai balas jasa faktor produksi tenaga

The figure indicates that the flow of goods and services produced by firms equals the flow of income received by households, which in turn equals the value of household expenditures.

In practice, goods and services used for consumption and capital formation are not entirely domestically produced; a portion is imported. Conversely, not all domestically produced goods and services are consumed domestically; some are exported. This characterizes an open economy.

In the context of regional income, the term 'abroad' also includes other regions. Likewise, the money used as compensation for labor as a factor of production is not

kerja, kemungkinan tidak habis dikonsumsi. Oleh karena itu, dengan perekonomian terbuka, serta adanya tabungan dan investasi dapat digambarkan melalui diagram alur seperti gambar diatas, namun tentu lebih rumit.

Dengan melihat siklus ekonomi di atas, dapat disimpulkan bahwa Pendapatan Regional adalah sebagai berikut:

- a. ditinjau dari segi produksi, disebut Produk Regional, merupakan jumlah nilai tambah (output – konsumsi antara) yang dihasilkan oleh unit-unit produksi yang dimiliki oleh penduduk suatu daerah dalam jangka waktu tertentu (satu tahun);
- b. ditinjau dari segi pendapatan, disebut Pendapatan Regional, merupakan jumlah pendapatan (balas jasa) yang diterima oleh faktor produksi yang dimiliki oleh penduduk suatu daerah dalam jangka waktu tertentu (satu tahun);
- c. ditinjau dari segi pengeluaran, disebut Pengeluaran Regional, merupakan jumlah pengeluaran konsumsi yang dilakukan oleh rumah tangga, lembaga swasta nirlaba, pemerintah, pembentukan modal tetap bruto, perubahan inventori dan ekspor neto suatu daerah dalam jangka waktu tertentu (satu tahun).

Dalam kenyataannya pendapatan yang dihasilkan oleh masyarakat suatu daerah belum tentu akan dinikmati/digunakan oleh masyarakat tersebut, dan begitu juga sebaliknya ada pendapatan yang dinikmati oleh masyarakat daerah tersebut yang berasal dari daerah lainnya. Sehubungan dengan itu maka menimbulkan aliran pendapatan dari satu daerah ke daerah lainnya.

*necessarily entirely consumed. Therefore, with an open economy, as well as the existence of savings and investment, it can be illustrated through a flow diagram like the figure above, but it is certainly more complex.*

*From the economic cycle above, it can be concluded that Regional Income is as follows:*

- a. from production view, called Regional Product, that is the amount of value added (output – intermediate consumption) that produced by production units owned by residents in a region in a specific period of time (one year).*
- b. from income view, called Regional Income, that is the amount of income (compensation) received by factors of production owned by residents in a region in a specific period of time (one year).*
- c. from expenditure view, called Regional Expenditure, that is the amount of consumption expenditure of households, Non Profit Institution Serving Household (NPISH), government, gross fixed capital formation, changes in inventories and net export of a region in a specific period of time (one year).*

*In practice, the income generated by a region's residents is not necessarily enjoyed or utilized by those residents, and conversely, some income enjoyed by the region's residents may originate from other regions. Consequently, this results in income flows between regions.*

Produktivitas suatu daerah dicerminkan oleh produk domestik, sedangkan tingkat kesejahteraan masyarakat dapat dilihat dari sudut pendapatannya, setelah diperhitungkan aliran pendapatan yang keluar masuk daerah tersebut.<sup>1)</sup>

### **1.3 Pengertian Tentang PDRB**

Salah satu indikator penting untuk mengetahui kondisi ekonomi di suatu daerah dalam suatu periode tertentu adalah data Produk Domestik Regional Bruto (PDRB), baik atas dasar harga berlaku maupun atas dasar harga konstan.

PDRB pada dasarnya merupakan jumlah nilai tambah yang dihasilkan oleh seluruh unit usaha dalam suatu daerah tertentu, atau merupakan jumlah nilai barang dan jasa akhir (neto) yang dihasilkan oleh seluruh unit ekonomi. PDRB atas dasar harga berlaku menggambarkan nilai tambah barang dan jasa yang dihitung menggunakan harga yang berlaku pada setiap tahun, sedangkan PDRB atas dasar harga konstan menunjukkan nilai tambah barang dan jasa tersebut yang dihitung menggunakan harga yang berlaku pada satu tahun tertentu sebagai dasar. Dalam publikasi ini tahun dasar yang digunakan adalah tahun 2010. PDRB atas dasar harga berlaku dapat digunakan untuk melihat pergeseran dan struktur ekonomi, sedangkan harga konstan digunakan untuk mengetahui pertumbuhan ekonomi dari tahun ke tahun.

Terdapat tiga pendekatan yang digunakan untuk menghitung angka PDRB, yakni:

1. **Pendekatan Produksi**, PDRB adalah jumlah nilai tambah atas barang dan jasa yang dihasilkan oleh berbagai unit

*A region's productivity is reflected in its domestic product, whereas the welfare level of its population can be assessed from an income perspective, after accounting for income inflows and outflows to and from the region.<sup>1)</sup>*

### **1.3 Definition of GRDP**

*One important indicator to determine the economic conditions of a region in a given period is Gross Regional Domestic Product (GRDP), either at current prices and constant prices.*

*GRDP basically is the sum of value added that produced by all unit of production in a region or a total value of final goods and services (net) produced by all unit of economy. GRDP at current prices describe the value added of goods and services calculated using current prices at each year, while GRDP at constant prices shows value added of goods and services calculated using the prices in a particular year as a basis. The base year used in this publication is 2010. GRDP at current prices can be used to indicate the shifting and structure of economy, while at constant prices used to determine the economic growth from year to year.*

*There are three approaches used to compile figures of GRDP:*

1. **Production Approach**, GRDP is the amount of value added produced by production units in a part of a region in a

---

1) Sampai saat ini data *net factor income from abroad* belum dapat dideteksi dengan baik

1) *Until now the data of net factor income from abroad has not been detected very well*

produksi di wilayah suatu daerah dalam jangka waktu tertentu (biasanya satu tahun).

2. **Pendekatan Pendapatan**, PDRB merupakan jumlah balas jasa yang diterima oleh faktor-faktor produksi yang ikut serta dalam proses produksi di suatu daerah dalam jangka waktu tertentu (biasanya satu tahun).
3. **Pendekatan Pengeluaran**, PDRB adalah semua komponen permintaan akhir yang terdiri dari: (1) pengeluaran konsumsi rumah tangga dan lembaga swasta nirlaba, (2) konsumsi pemerintah, (3) pembentukan modal tetap domestik bruto, (4) perubahan inventori, dan (5) ekspor neto, (ekspor neto merupakan ekspor dikurangi impor).

Secara konsep, tiga pendekatan tersebut akan menghasilkan angka yang sama. Dalam publikasi ini disajikan PDRB dengan pendekatan Produksi.

#### **1.4 Kegunaan Data PDRB**

Data PDRB adalah salah satu indikator ekonomi makro yang dapat menunjukkan kondisi perekonomian daerah setiap tahun. Manfaat yang dapat diperoleh dari data ini antara lain:

1. PDRB atas dasar harga berlaku (nominal) menunjukkan kemampuan sumber daya ekonomi yang dihasilkan oleh suatu daerah. Nilai PDRB yang besar menunjukkan kemampuan sumber daya ekonomi yang besar, begitu juga sebaliknya;
2. PDRB atas dasar harga konstan (riil) dapat digunakan untuk menunjukkan laju pertumbuhan ekonomi secara keseluruhan atau setiap lapangan usaha dari tahun ke tahun.
3. Distribusi PDRB atas dasar harga berlaku menurut lapangan usaha menunjukkan struktur perekonomian

*specified period of time (usually one year).*

2. **Income Approach**, GRDP is the amount of compensation received by factors of production which contribute in production process in a particular region in a specific period of time (usually one year).
3. **Expenditure Approach**, GRDP is final demand components which consist of: (1) household consumption expenditure and NPISHs, (2) government expenditure, (3) gross fixed capital formation, (4) changes in inventories, and (5) net export, (net export is equal to export less import).

*Conceptually, these three approaches will provide the same results. This publication presents GRDP by production approach.*

#### **1.4 Benefit of GRDP Data**

*GRDP data is one of macro economy indicator that shows the economic condition of particular every year. Benefits obtained from GRDP data are:*

1. *GRDP at current prices (nominal) shows the power of economic resources in a region. High GRDP figures delineate a lot power of economic resources, and vice versa;*
2. *GRDP at constant prices (real) shows economic growth rate as a whole or by industry in series.*
3. *Distribution of GRDP at current prices by industry shows economic structures or roles of every economic industry in a*

atau peranan setiap lapangan usaha dalam suatu daerah. Lapangan usaha yang mempunyai peran besar menunjukkan basis perekonomian suatu daerah.

4. PDRB per kapita atas dasar harga berlaku menunjukkan nilai PDRB per kepala atau per satu orang penduduk.
5. Indeks implisit PDRB menunjukkan perubahan harga pada periode tertentu terhadap periode tahun dasar.
6. Indeks Perkembangan PDRB menunjukkan perubahan hasil proses produksi dalam satu periode tertentu dibandingkan dengan periode tahun dasar.

### **1.5 Perubahan Tahun Dasar PDRB**

Badan Pusat Statistik (BPS) telah melakukan perubahan tahun dasar dalam penyusunan Produk Domestik Regional Bruto (PDRB) dari tahun 2000 menjadi tahun 2010. Perubahan tahun dasar dilakukan karena selama sepuluh tahun terakhir telah terjadi banyak perubahan baik pada tatanan global maupun lokal yang berpengaruh pada perekonomian nasional.

PDRB tahun dasar 2010 berpedoman pada Sistem Neraca Nasional (SNN) 2008. SNN 2008 adalah rekomendasi internasional tentang bagaimana menyusun ukuran aktivitas ekonomi yang sesuai dengan standar neraca baku yang didasarkan pada prinsip-prinsip ekonomi. Perubahan juga dilakukan pada pembaharuan konsep definisi, klasifikasi, cakupan dan metodologi.

*region. Economic industries with a large role show the basis of economy in a region.*

4. *GRDP per capita at current prices represent the value of GRDP per person.*
5. *Implicit Index of GRDP shows price changes in a certain period compared to the base year.*
6. *Trend of GRDP shows the changes in the results of production in a certain period compared to the base year.*

### **1.5 Rebasing of GRDP**

*BPS-Statistics Indonesia has rebased the compilation of Gross Regional Domestic Product (GRDP) from 2000 to 2010. The changes made since in the last ten years there have been many changes in both the global and local arrangements that affect the national economy.*

*GRDP base year 2010 based on the System of National Accounts (SNA) 2008. SNA 2008 is the internationally agreed standard set of recommendations on how to compile measures of economic activity in accordance with strict accounting conventions based on economic principles. Changes also made on the renewal of the concept definition, classification, coverage and methodologies.*
